

White Summit Engineering (WSE) owners and resources have over 30 years of experience; a company formed by old pros providing comprehensive, integrated, multidisciplinary engineering, project management, construction and consulting solutions. WSE is dedicated to providing clients with superior technical service through our engineers and design professionals. WSE has expertise in process, engineering, design, procurement, installation, project management, construction management and commissions through our known resource that we share a partnership with.

Our vast alliances enable us to handle projects of different sizes and complexity. Teams are assembled upon clients' specific project requests. Leading engineers and design professionals-hand-picked to meet the specific demands of your project. This helps assure our clients that we are providing the most qualified individuals dedicated to their projects. WSE only operates with known personnel which is how we provide superior services without the risk of a weak link in the form of unverified "talent". Our services are available within and beyond our region via state-of-the-art communications and collaboration with abundant, widespread, industry relationships.

WSE offers exceptional project management services. Our project managers and engineers have extensive experience in communication, scope development, risk management cost control, schedule compliance and resource management while always keeping an eye on quality and safety. Our PM's have the ability to pull from our known outside resource when it is needed to produce the best possible solutions for our project and our client.

Our promise to you: If WSE is unable to provide the appropriate services to fulfill the clients' needs, WSE will decline the opportunity upfront. This action increases trust and a strong bond in an ongoing working relationship.
